

June 2009

## Security That's More Than Just Tracking

(for as low as a penny a mile – truck, trailer and OTA)

### MAGTEC

delivers the security intelligence  
behind your decision-making  
that keeps you one step ahead

MAGTEC's technology has travelled hundreds of millions of miles and is backed by a wide customer base. The company's focus and core business continues to be on pure security for ground transportation - encryption, authentication, secure communication, remote control, and vehicle security intelligence. The company's capabilities are supported by studies, research and documented proof that state the company does what it says, and does it well.

MAGTEC continues to provide the most secure technology available. The company's highly encrypted and secure vehicle disabling technology has been well studied and rigorously tested. One of several successful evaluations was the U.S. Department of Transportation (DOT) and Federal Motor Carrier Safety Administration's (FMCSA) "Best Practices for Industry and Law Enforcement" report in November 2007, which identified MAGTEC as the leading technology. Another very successful initiative with the Department of Homeland Security (DHS) and the Transportation Security Administration (TSA) will be made public in a May 2009 report, supporting MAGTEC's technology as qualifying for a number of federally funded urban transportation security initiatives.

Robert Morisset, president & CEO of MAGTEC Products, Inc. says, "Our unique wireless on-board vehicle control platform provides unparalleled security and a proven solution to mitigate the security risks associated with ground transportation, all in real time. Our objective today is to ensure we provide carriers and shippers with the knowledge of how MAGTEC can help them cut costs while providing an opportunity to implement our low cost, total security and control solution."

Over the road carriers can secure both truck and trailer for **as low as 1.1¢ (cents) per mile – including over-the air costs**. Short haul and local carriers can benefit from the same high level of security for as low as 14.8¢ (cents) per hour. Please call for more information on how this differentiator can help you secure your assets, manage in-transit drivers, and attract new business.

**MAGTEC Covert Remote Vehicle Control  
Over the Air... In Real Time... All of the Time!**
