

Oil & Gas Producers and Contractors

Uncompromised Command & Control
... so you can relax and focus on other things.

How safe are your employees or contractors when they're alone in a remote location? A serious injury can leave someone at risk of hypothermia, shock and even death...
What if no one knows there's a problem?

If you've got a man down in the field, can he signal for help? What have you done to protect him? If you've got staff, contractors and/or service companies out on a lease and there's a significant incident, you could be faced with:

- » Loss of life
- » Regulatory fines
- » Lawsuits
- » Damaged reputation
- » Lost production

How do you know whether your people are compliant?
How do you stop them from violating company policies? Unattended, idling vehicles and equipment leave a big carbon footprint and are at risk of theft.

Your specialized equipment is not easily replaced if stolen or involved in an accident.

Peace of Mind

Ensure yours by installing MAGTEC's advanced safety and security system on your trucks and equipment. MAGTEC is the only technology that gives you **COMPLETE ACCESS CONTROL over your equipment and vehicles 24/7**. With MAGTEC in place, you can:

- » Keep Workers Safe with Lone Worker & Man Down Solutions
- » Enforce Speed & Idling policies remotely
- » Remotely Disable
- » Block Unauthorized Drivers
- » Maintain Complete Control
- » Keep Insurance Costs Down

Arm your employees and contractors with a wireless safety solution – they are your most valuable assets.

DEAD SIMPLE TO USE

It starts with hardware installed on each vehicle — an on-board computer that automatically secures the vehicle. A simple, easy to use keypad allows access.

Each operator must enter a unique PIN before the engine can be started. That PIN can be remotely managed by using MAGTEC's secure, central management web-based software. This powerful, easy-to-use tool returns the operational power back to you, instantly.

In case of an injury or incident, MAGTEC's Lone Worker/Man Down solution gives your personnel the ability to signal for help.

Only MAGTEC offers a comprehensive solution 24/7 to prevent unauthorized use of your equipment, ensuring you maintain full visibility and control.

Get real-time answers to these questions

- » Are my people safe?
- » Where is my vehicle?
- » Who is operating the vehicle?
- » Is my expensive equipment where it is supposed to be?
- » Does the vehicle need to be shutdown immediately?
- » Are the drivers where they are supposed to be?
- » Are they operating the vehicle safely?
- » Is it being operated within the assigned zone?
- » Is it being operated out of the assigned schedule?

With MAGTEC's advanced command and control solutions you can

- » Set up driver profiles on vehicles
- » Set up geo-fences and routes
- » Reduce fuel usage
- » Automate Driver elogs (HOS)
- » Remotely enforce maximum speeds & idling
- » Report on operational statistics such as Run-time, Trip reports, Idle times, Driver ID and Exceptions
- » Set up operation schedules
- » Receive real-time event notifications
- » Check seat belt, engine status and other event indicators
- » Create multiple map views
- » Provide detailed location information

MAGTEC is the only advanced fleet security and control solution vetted by The Department of Homeland Security (DHS) and The Transportation Security Administration (TSA). We keep your people, your equipment and your reputation safe.

Safeguard your assets

Many companies are still under the impression that simple tracking or fleet management systems are enough to maximize security and increase productivity.

They're wrong.

Knowing where your vehicles and equipment are might not be enough. Only MAGTEC can ensure authorized personnel alone have access to your assets.

MAGTEC provides unmatched remote command and control.

Our ROI is unbeatable – ask us how.

MAGTEC – Maximize Control, Security and Profits

Install MAGTEC, so you can rest easy.

Call MAGTEC today to find out why our products and solutions are the preferred choice of companies who recognize that there is much more to safety and security than just tracking.
