Public Transportation - Transit

Enhanced Fleet Security and Control

Increase Safety and Compliance, Reduce Your Carbon Footprint

... so you can relax and focus on other things.

Anyone can start a bus...no key required, putting them at high risk for theft, hijacking and joyriding. Your drivers and their buses are in the public eye - **do you know what they're doing when no one's looking?** Are you confident your precious cargo - people - are being transported safely?

What if an event happens - accident, hijacking or terrorist act? **Can you regain command of the bus?** It's not your fault, but when lives are at risk you need to be able to control where and when that bus can be driven.

Gain total access control by preventing unauthorized use at any time, from anywhere in the world—24/7.

Peace of Mind

Ensure yours by installing MAGTEC's advanced security system on your buses. MAGTEC is the only technology that allows public transportation companies **COMPLETE ACCESS CONTROL** over their vehicles 24/7. With MAGTEC in place, you can:

- » Set Maximum Speeds
- » Improve Safety
- » Manage Schedules
- » Monitor Maintenance
- » Maintain Complete Control

Keep your riders safe and reduce your carbon footprint at the same time.

DEAD SIMPLE TO USE

It starts with hardware installed on each vehicle — an on-board computer that automatically secures the vehicle. A simple, easy to use keypad allows access.

Each operator must enter a unique PIN before the engine can be started. That PIN can be remotely managed by using MAGTEC's secure, central management web-based software. This powerful, easy-to-use tool returns the operational power back to you, instantly.

Only MAGTEC offers a comprehensive solution to prevent theft and ensure passenger safety, returning command, control and full visibility back to you.

Get real-time answers to these questions

- » Where is my vehicle?
- » Who is operating the vehicle?
- » Are the vehicles on the correct route?
- » Does the vehicle need to be shutdown immediately?
- » Are the drivers where they are supposed to be?
- » Are they operating the vehicle safely?
- » Is it being operated within the assigned zone?
- » Is it being operated out of the assigned schedule?

MAGTEC gives you access control to your vehicles anywhere, anytime - 24/7.

With MAGTEC's advanced command and control solutions you can

- » Set up geo-fences and routes
- » Set up driver profiles on vehicles
- » Reduce fuel usage
- » Automate Driver elogs (HOS)
- » Remotely enforce maximum speeds & Idling
- » Report on operational statistics such as Run-time, Trip reports, Idle times, Driver ID and Exceptions
- » Set up operation schedules
- » Check seat belt, engine status and other event indicators
- » Create multiple map views
- » Provide detailed location information

Safeguard the public AND your vehicles and drivers

Many companies are still under the impression simple tracking or fleet management systems are enough to maximize security and increase productivity.

They're wrong.

Knowing where your vehicles are might not be enough. Only MAGTEC can ensure authorized personnel alone are in control of your vehicles. MAGTEC provides unmatched remote command and control.

MAGTEC is the only advanced fleet security and control solution vetted by The Department of Homeland Security (DHS) and The Transportation Security Administration (TSA) and qualifies for Federal Funding under FEMA's Transit Security Grant Program. We keep your vehicles, your riders and your reputation safe.

Our ROI is unbeatable - ask us how

MAGTEC - Maximize Control, Security and Profits

Install MAGTEC, so you can rest easy.

Call MAGTEC today to find out why our products and solutions are the preferred choice of companies who recognize that there is much more to security than just tracking.
