

Transportation – High Value / High Risk

Access and operational control from origin to destination... so you can relax and focus on other things.

High Value Goods go from one Highly Secured Facility to another Highly Secured Facility.

The weakest link in the supply chain is while your vehicle is in transit and it's only protection is the ignition switch.

You are responsible for your customer's high value or sensitive goods – and you are a target for thieves. While in transit, how do you know your drivers, vehicles and goods are safe and where they are supposed to be?

Peace of Mind

Ensure yours by installing MAGTEC's advanced security system on your trucks. MAGTEC is the only technology that allows transportation companies **COMPLETE ACCESS CONTROL** over their vehicles 24/7. With MAGTEC in place, you can:

- » Remotely Disable
- » Block Unauthorized Drivers
- » Maintain Complete Control
- » Secure Cargo
- » Keep Insurance Costs Down

Your cargo is important; **your reputation is priceless**. Don't let anyone steal either of them.

DEAD SIMPLE TO USE

It starts with hardware installed on each vehicle — an on-board computer that automatically secures the vehicle. A simple, easy to use keypad allows access.

Each operator must enter a unique PIN before the engine can be started. That PIN can be remotely managed by using MAGTEC's secure, central management web-based software. This powerful, easy-to-use tool returns the operational power back to the transportation company, instantly.

In case of a hijacking, the driver has a wireless panic button, which allows the driver to shut down the truck and send an Immediate Alert.

Gain permanent command, control and visibility of your vehicle fleet and eliminate the risk associated with moving valuable goods and cargo through the supply chain.

Get real-time answers to these questions

- » Where is my vehicle?
- » Who is operating the vehicle?
- » Are the goods where they are supposed to be?
- » Does the vehicle need to be shutdown immediately?
- » Are the drivers where they are supposed to be?
- » Are they operating the vehicle safely?
- » Is it being operated within the assigned zone?
- » Is it being operated out of the assigned schedule?

With MAGTEC's advanced command and control solutions you can

- » Set up driver profiles on vehicles
- » Set up geo-fences and routes
- » Report on operational statistics such as Run-time, Trip reports, Idle times, Driver ID and Exceptions
- » Set up operation schedules
- » Automate Driver elogs (HOS)
- » Remotely enforce maximum speeds & idling
- » Set up operation schedules
- » Be notified immediately if the trailer doors are opened or if it deviates from a specified route
- » Check seat belt, engine status and other event indicators
- » Create multiple map views
- » Provide detailed location information

MAGTEC is the only advanced fleet security and control solution vetted by The Department of Homeland Security (DHS) and The Transportation Security Administration (TSA). We keep your people, your equipment and your reputation safe.

Safeguard your assets

Many companies are still under the impression that simple tracking or fleet management systems are enough to maximize security and increase productivity.

They're wrong.

Knowing where your vehicle and trailer are might not be enough. Only MAGTEC can ensure authorized personnel alone have access to your assets.

MAGTEC provides unmatched remote command and control.

Our ROI is unbeatable – ask us how

MAGTEC – Maximize Control, Security and Profits

Install MAGTEC, so you can rest easy.

Call MAGTEC today to find out why our products and solutions are the preferred choice of companies who recognize that there is much more to security than just tracking.
