

Transportation – Trailer Security

Maximize trailer and cargo security... so you can relax and focus on other things.

Your trailers and their contents are valuable... are you confident they're safe after your drivers have gone? Are you certain your trailers are where they're supposed to be? You may trust your drivers, but once they've left the trailer and cargo behind, anything can happen.

Do you rely on your 3PL provider to keep your product safe? Traditional trailer tracking only provides one locate per day and creates a false sense of security. A trailer seal only tells you if your cargo has been compromised, but does nothing to secure it.

Electronics, clothing, pharmaceuticals, tobacco, food & beverage — everything is a target for theft — to the tune of **\$30+ billion annually**.

Peace of Mind

Ensure yours by installing MAGTEC's advanced security system on your trailers. MAGTEC is the only technology that gives you **COMPLETE ACCESS CONTROL over your trailer 24/7**. With MAGTEC in place, you can:

- » Stop Theft
- » Maintain Complete Control
- » Real-time locates
- » Secure Trailer
- » Keep Insurance Costs Down
- » Improve Utilization

Only MAGTEC offers a comprehensive solution to ensure your trailers are secure and remain in the designated location, alerting you if an unauthorized move occurs.

DEAD SIMPLE TO USE

It starts with hardware installed on each Trailer — a covert system that automatically reports the trailer location. An internal, electronic door lock can be remotely configured and controlled by using MAGTEC's MCC™ (Mobile Command & Control). MCC is our secure, central management web-based software. This powerful, easy-to-use tool gives the transportation company or shipper the ability to track and control access to the trailer.

Gain permanent command, control and visibility of your trailer fleet and eliminate the risk associated with moving valuable goods and cargo through the supply chain.

Get real-time answers to these questions

- » Is my trailer where it's supposed to be?
- » Who has access to my trailer?
- » Is my cargo and trailer safe?
- » Has my trailer been opened?
- » Has there been any unauthorized movement of my trailer?

With MAGTEC's advanced command and control solutions you can

- » Remotely control locks
- » Be confident that the integrity of your supply chain is maintained
- » Check on additional trailer sensors and equipment
- » Remotely check on battery power and auxiliary power equipment
- » Set up geo-fences and routes
- » Report on operational statistics such as run-time, trip reports, and exceptions
- » Set up operation schedules
- » Be notified immediately if the trailer doors are opened or if it deviates from a specified route
- » Provide detailed location information

MAGTEC is the only advanced fleet security and control solution vetted by The Department of Homeland Security (DHS) and The Transportation Security Administration (TSA). We keep your vehicles, your cargo and your reputation safe.

Safeguard your assets

MAGTEC's trailer solutions take security to a new level with the integration of the Power In-Lock®. An internal lock that is easily mounted to standard trailer roll-up or swing-out doors, provides a strong barrier for security.

The Power In-Lock® has a slam-lock and auto-lock/relock feature that ensures the trailer is securely locked every time the door is closed. Authorized administrators have the ability to lock or unlock the trailer over the air using MAGTEC's MCC platform. MCC can also send event notifications to designated personnel when the doors are opened and closed.

MAGTEC - Maximize Control, Security and Profits

Install MAGTEC, so you can rest easy.

Call MAGTEC today to find out why our products and solutions are the preferred choice of companies who recognize that there is much more to security than just tracking.
